ETAP tomorrow's light

# K9

DISCREET DESIGN

K9 proves that emergency lighting can be both attractive and discreet. Minimalist design, compact execution and high-quality finish ensure that signage and lighting luminaires can be perfectly integrated into **any environment**.

The K9 series is a complete range of recessed and surface-mounted emergency luminaires. They all make use of the same style features and components, which contributes to the **uniform implementation** of all of your emergency lighting.

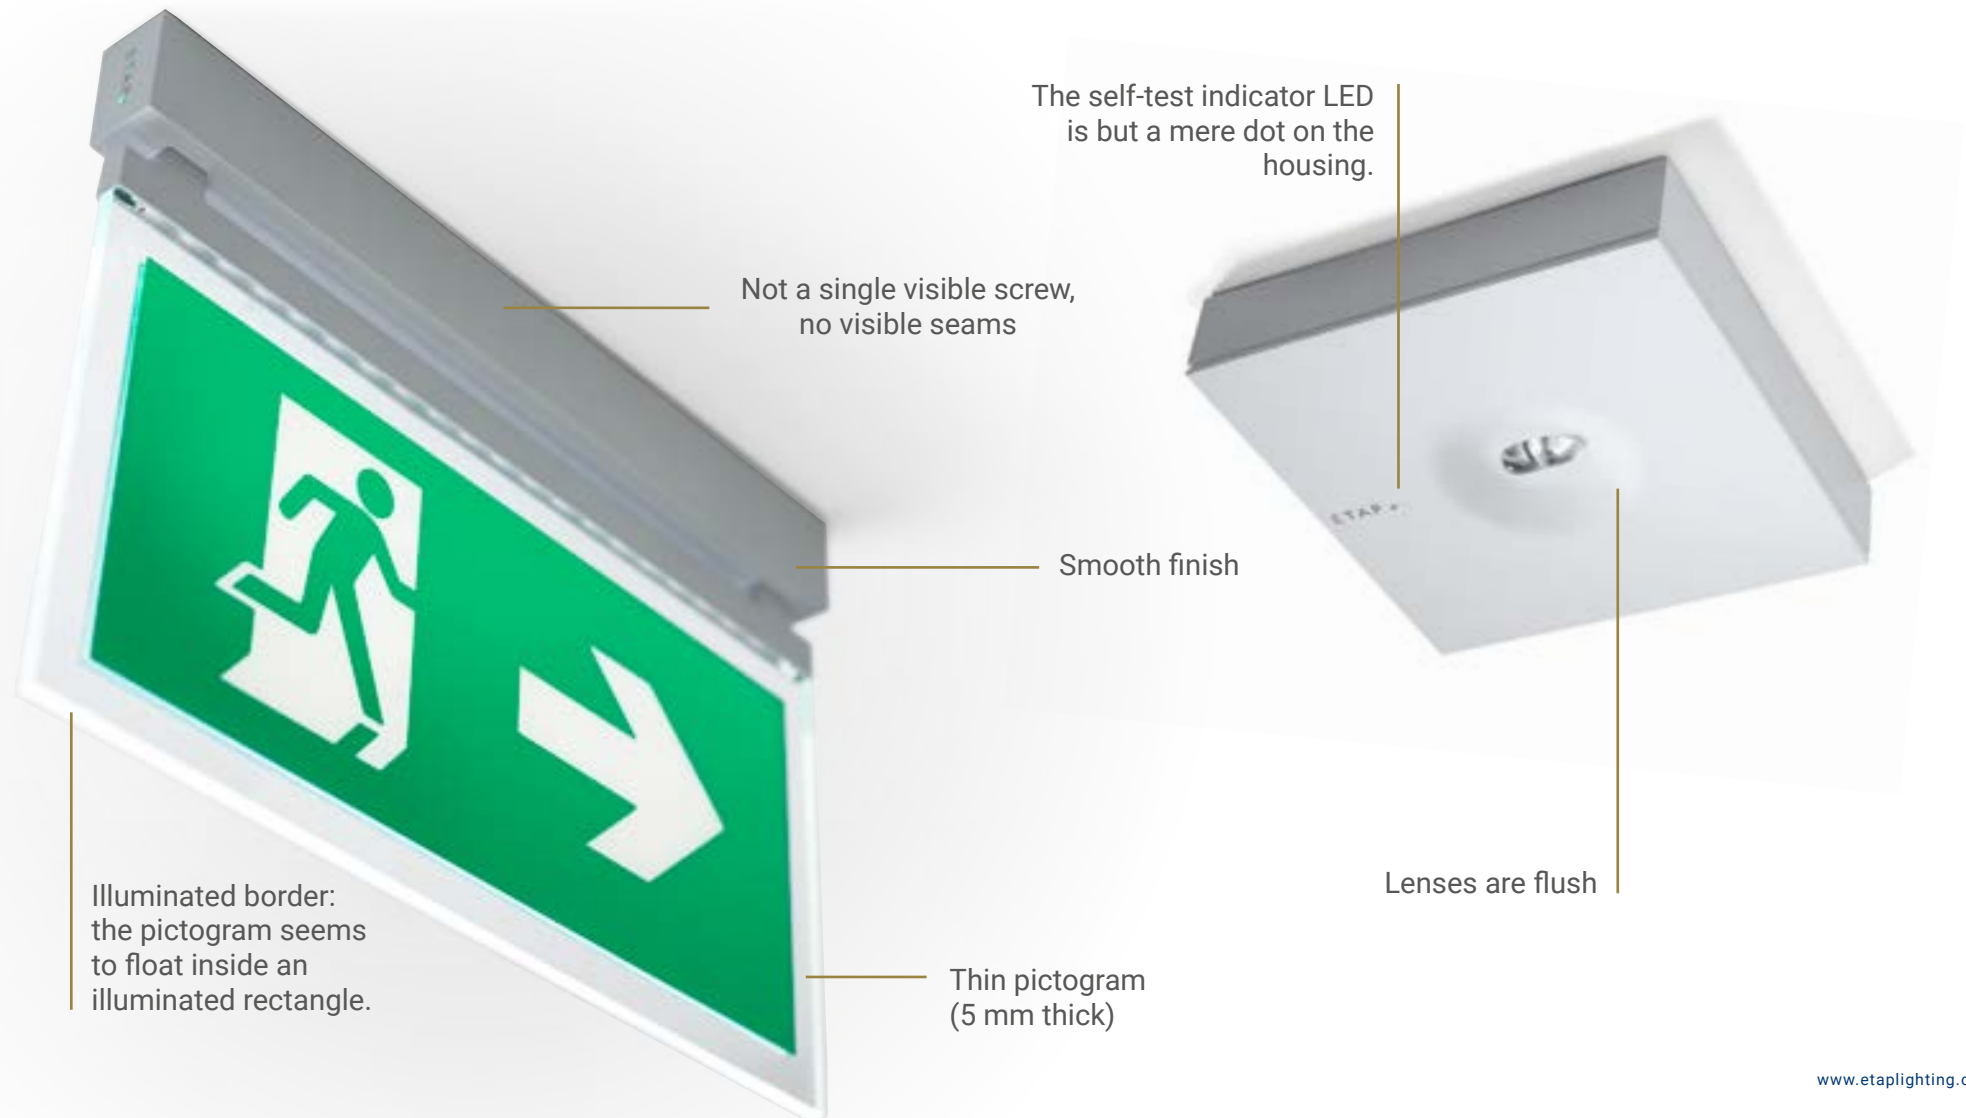

All K9 luminaires are available in white, grey and black or in any RAL colour on demand.

K9

DISCREET DESIGN

ETAP tomorrow's light

The self-test indicator LED is but a mere dot on the housing.

Not a single visible screw, no visible seams

Smooth finish

Illuminated border: the pictogram seems to float inside an illuminated rectangle.

Thin pictogram (5 mm thick)

Lenses are flush

K9

SIGNAGE

ETAP tomorrow's light

The dot-matrix pattern on the inside ensures an even illumination of the entire pictogram.

Viewing distance: 26 m

The lens distributes the light evenly over the pictogram

Viewing distance: 15 m

### COMPLIANT SIGNAGE

Signage luminaires effortlessly meet the EN 1838 standard:

- 1 lux on the floor for **changes in direction**, at **crossings** and near **emergency doors**.
- 5 lux vertical illuminance near **first-aid stations** and **fire-extinguishing equipment**

# K9

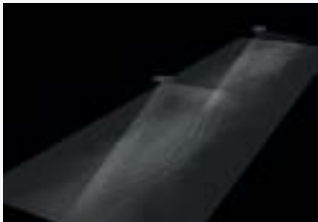

## LIGHTING

K9 provides compliant solutions for escape route, anti-panic and staircase lighting. For each application, K9 has a specific lens, which always delivers top performance.

### ESCAPE ROUTE

A **wide-angled** lens focuses the light along the centre line of the escape route.

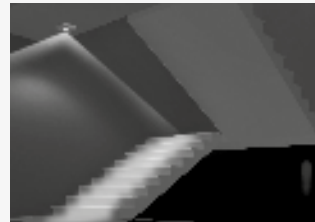

### ANTI-PANIC

The **square light distribution** gives a uniform illumination over a large area, without dark spots.

### HIGH LUMEN OUTPUT

The light is concentrated in an **elliptical** shape, ideal for higher lux levels, staircases, or high mounting heights.

EASY TO MANAGE & MAINTAIN

## SELF-TESTING LUMINAIRES

- All of ETAP's emergency luminaires come with a self-test: EST+ (European Safety Test)
- EST+ performs weekly function tests, and 3-monthly autonomy tests, enabling you to always rely on your emergency lighting
- A single green/orange bicolor led indicates the status of the luminaire

## ETAP SAFETY MANAGER

- ESM centralizes the monitoring and control of your entire emergency lighting installation
- Luminaires are connected via a wired bus, or wireless 
- See the installation status in a single overview, receive automated emails when maintenance is due, manage the self-test moments and prepare preventative maintenance

## ETAP BATTERY SYSTEM

- A central battery system simplifies the maintenance
- Choose EBS compact for a cabinet per fire zone, or EBS Superior for an entire building
- Connects with ESM

Automatic connection: K9 luminaires are opened without the use of any tools, and in the process automatically disconnected from the mains. Maintenance can take place safely and on the ground.

**5** YEAR  
WARRANTY  
BATTERY INCL.

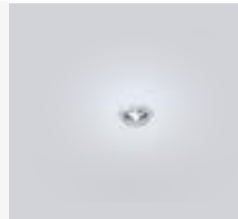

ETAP provides a 5 year warranty on the complete K9 range, including batteries.

# TOMORROW'S LIGHT

ENDLESS. EFFORTLESS. WASTELESS.

In a world facing severe challenges like global climate change and depletion of natural resources, ETAP's goal is to create tomorrow's light: **endless**, **effortless** and **wasteless**. We aim at helping our customers to reduce their carbon emissions and environmental footprint by providing long lasting energy-efficient lighting solutions with minimal use of virgin natural resources that are easy to maintain and refurbish.

As an active member of The Shift, ETAP has committed itself to achieving a CO2 reduction of 55% by 2025. Following the Science Based Target Initiative, our target is set with the goal to limit and eventually curb the global temperature rise and contribute to a zero-carbon economy.

Tap into tomorrow's light
